TECHNICAL BULLETIN

#21-EB Burnishing Compound

This is an outstanding blend of surfactants, detergents, softening agents, inhibitors and oil emulsifiers. Mildly acidic, biodegradable and non-hazardous, #21-EB keeps copper, brass and aluminum clean and bright. It prevents in-process rusting, provides excellent nightly rust protection, and is suitable in hard water areas. It is free rinsing with good detergency, meanwhile controlling foam height. This is an excellent compound for steel media.

Application

Use #21-EB between one and three ounces per gallon. Flow rate on flow-through system should be one to three gallons of water per cubic foot of machine capacity.

Color Code

Blue with faint characteristic odor.

Handling

#21-EB is an industrial strength product. Although it will not harm the skin with occasional contact, appropriate handling procedures should be followed.
