TECHNICAL BULLETIN #99 TRUCK WASH

Description

A granular, 100% active, readily soluble detergent combining wetting agents, water conditioners and synergists to make a safe, economical and effective vehicle cleaner. Specially formulated for high-pressure systems, this modern high performance detergent is safe on painted surfaces, strong enough to clean road film and oil deposits from engines and under-carriages and completely removes road film from automobiles, trucks, buses and aircraft. While this product was designed as a pressure washing detergent, it is also very effective when used by hand or brush-on methods. For use in any type of pressure washing equipment to clean automobiles, trucks, buses, aircraft, boats, machinery, buildings and equipment. Also recommended for use through steam cleaners.

Application

Mix 1/5 to 1/2 ounce per gallon of water depending upon the soil load and operating conditions. While it is effective in cold water, efficiency is increased with higher temperatures.
